

extensor™ Family

Extensor™ Family
is a mini-converter
product line

*The Extensor™ Family of Products offers a wide range of Digital Media Conversion by supporting many video input and output formats.
The architecture of Extensor Products is common on several points:*

• SETTINGS

Easy to set with the Mini Switch on the side of the Converter.

• UPGRADABILITY

Upgrade of your Extensor™ with new features through USB connector.

• POWER SUPPLY

Our Power Supply uses a lockable connector to prevent power disconnection. This universal power supply is delivered with international socket adapters for all countries.

• HD & SD

Extensor™ Family is auto-adaptive between standard definition and high definition video formats.

• 3Gb/s

Extensor™ Family is the first mini-converter supporting natively 3Gb/s HD-SDI.

ANA2SDI

Analog to HD-SDI converter

Input:

1 x Analog video.

Outputs:

2 x HD-SDI (3Gb/s) for redundant output or using a downscaler.

SDI Compliance: SMPTE-259M, SMPTE-292M & SMPTE-424M.

The two HD-SDI outputs can drive two different equipments

simultaneously at same or different resolution (ie: 1080p & 720p).

OSD Status gives you all the status information (ie: video signal detected, resolution and so on...) which are displayed overlaid on the video output signal.

One can also select a standardized colorbar pattern on the video output signal to properly calibrate your equipments.

VIDEO CONVERSION

Input	Output
YUV (3 BNC) S-video (2 BNC) Composite (1 BNC)	2 x HD-SDI 3 Gb/s (BNC)
Stereo unbalanced audio Digital audio AES / EBU	Embedded audio in SDI (stereo)
